

OIU

Faculty of Pharmacy

Phase 1 / semester 2

L1

ENAS ALI HASSAN

Pharmacognosy

Course Title

Pharmacognosy 1

Code of the Course

PH122

Course duration

17 weeks (3Weeks exams)

Credits Hours

3 credit hours (2+1)

Instructional strategies and methods

Lectures/Practical/Seminars/Tutorial

Prerequisite

Pharmaceutical botany

Course description and Rationale

This course entails an introduction to pharmacognosy and herbal remedies (phytomedicines) and provide scientific basis for the use of plants in pharmacy.

Students Assessment Methods

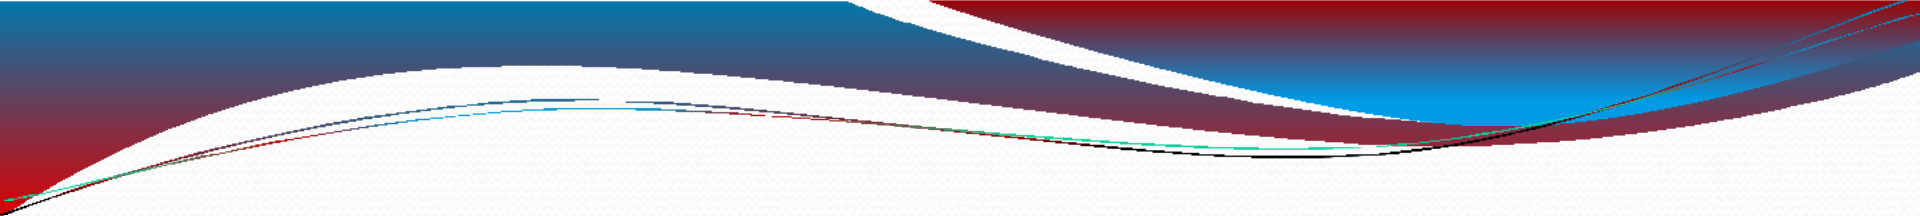

1. Formative assessment: Quiz

2. Summative assessment:

- *Practical activities and exam (20%)

- *Mid term exam (20%)

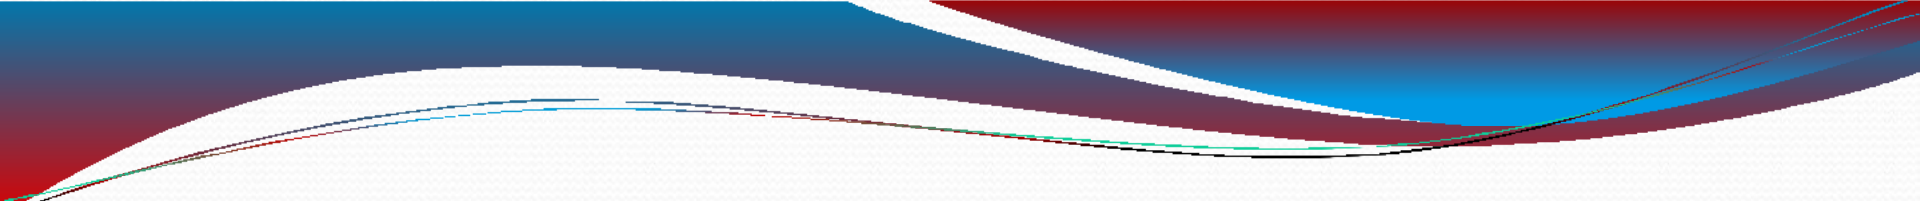

- *Final Assessment (60%)

Course Objectives

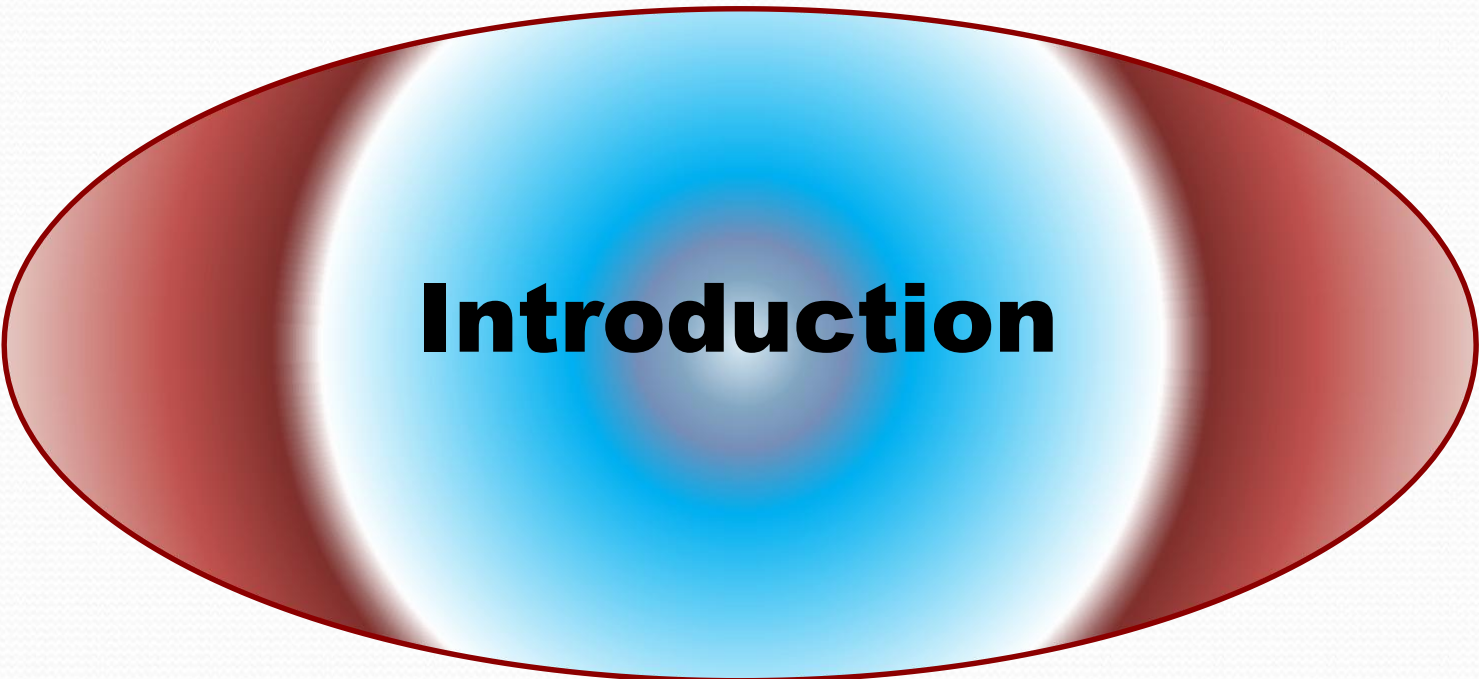

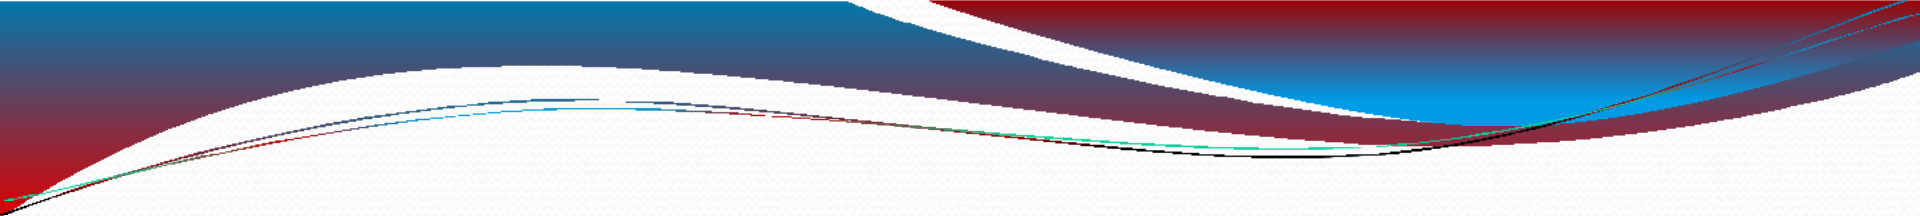

- 1.D**efine pharmacognosy,
- 2.E**xplain all features of this branch,
- 3.N**ame plants scientifically,
- 4.R**ecognize processes of cultivation, collection, preparation and classification of crude drugs,
- 5.D**escribe microscopical and macroscopical characters of different types of starch and differentiate between them.

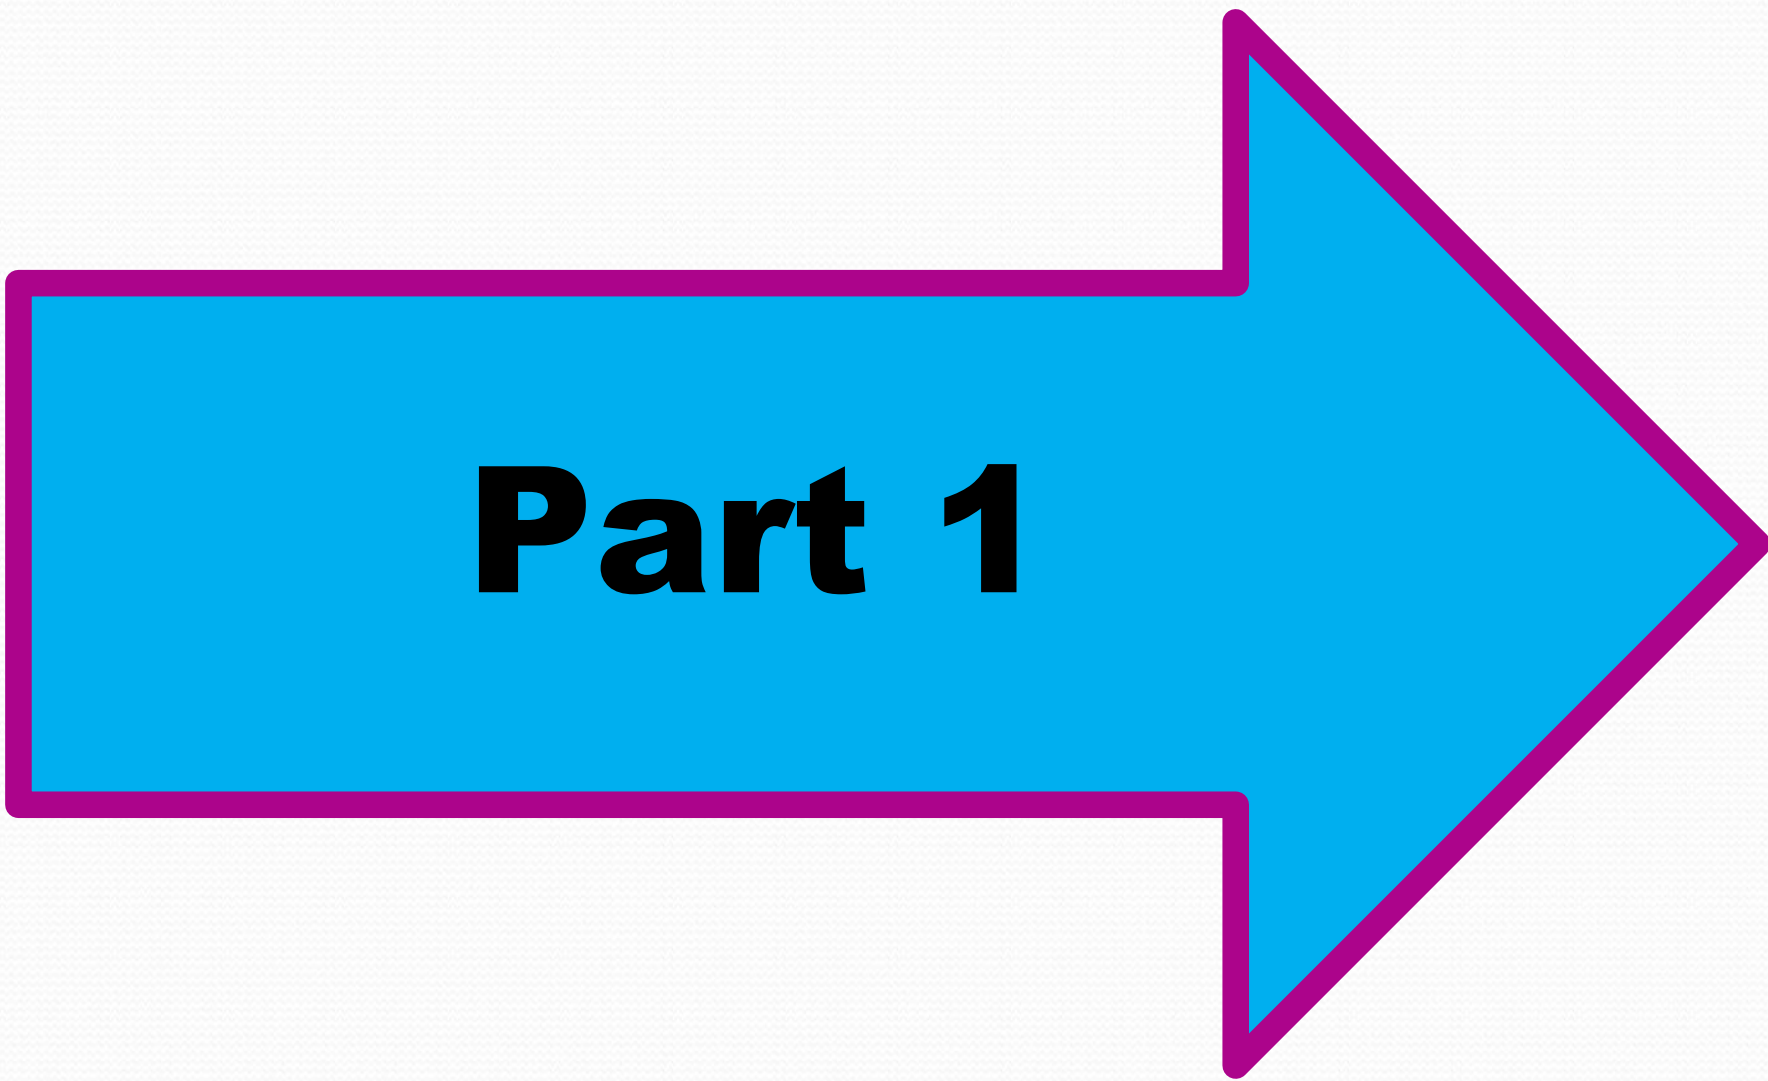

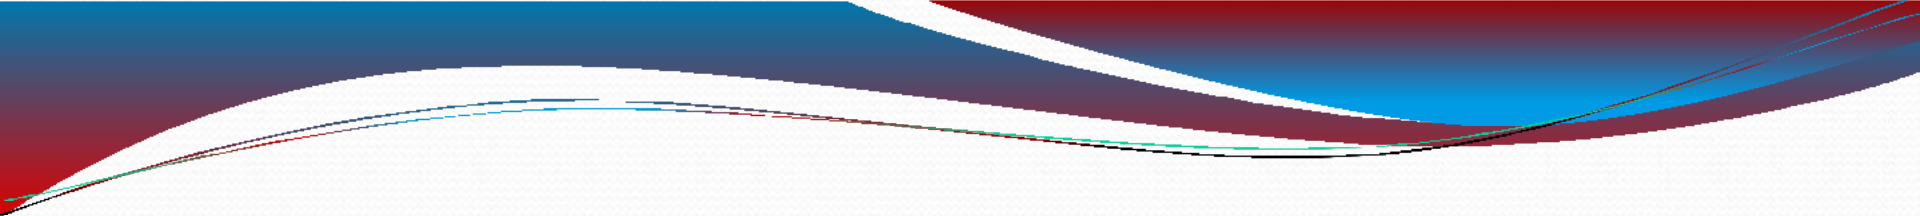

6.Demonstrate some microscopical, macroscopical characters and medicinal value of specific parts of selected plants (Rhizome , Roots, Leave, Flowers, Seeds, Fruits, Woods and Bark, Hairs and Fibers, Gums, Resins and Resin products).

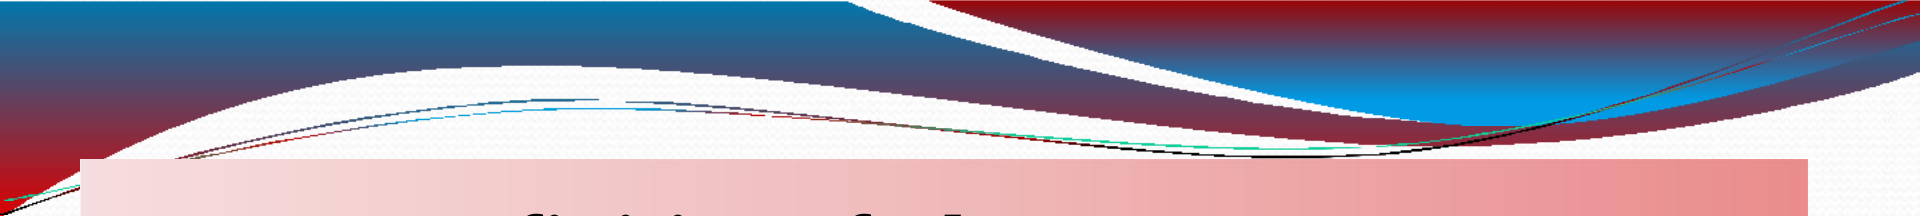

7.Recognize adulteration , evaluation of crude drugs and their detection by organoleptic, microscopic, physical, chemical and biological methods.

Introduction

Part 1

Definition of Pharmacognosy

The scientific study of the structural, physical
& chemical characters of **crude drugs** of

vegetable

marine

animal

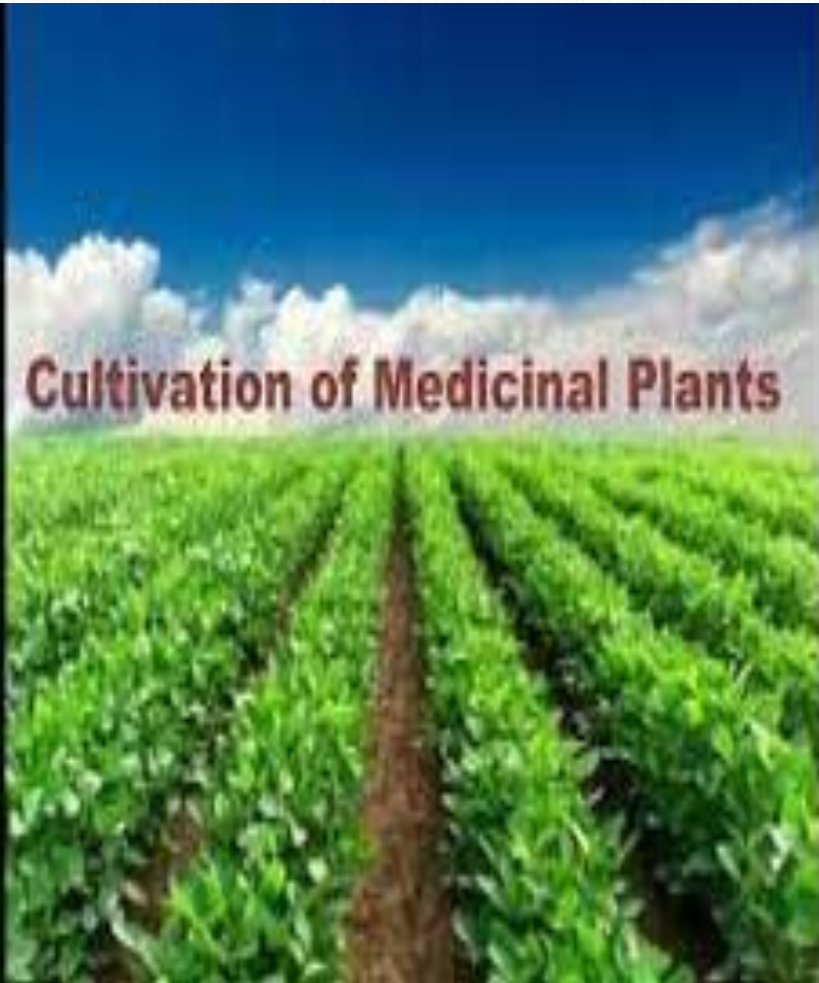

marine

including their history,

Cultivation of the medicinal plants ,

and methods involved in collection

& Processing from the producer to the distributor and Storage

Definition of Pharmacognosy

The scientific study of the structural, physical & chemical characters of crude drugs of vegetable, animal & mineral origin including their History, Cultivation of the medicinal plants & methods involved in Collection & Processing from the producer to the distributor and Storage.

Present State of Pharmacognosy

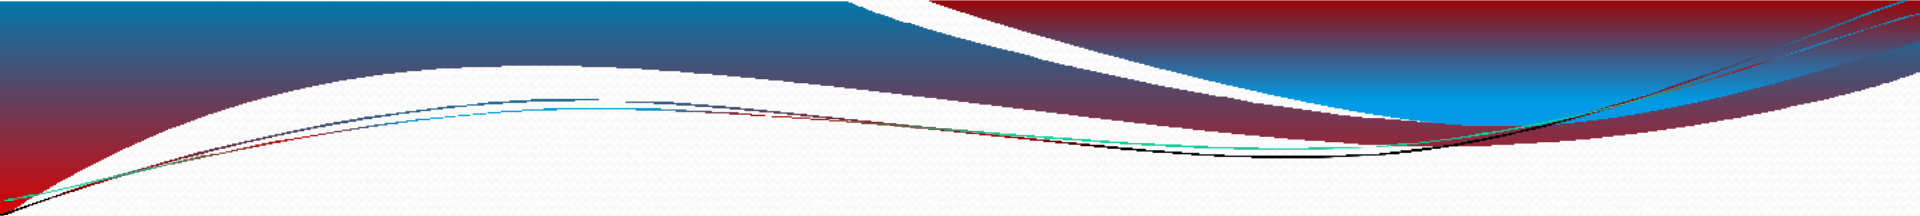

Recently it includes :

- ❑ Modern isolation techniques.
- ❑ Pharmacological tests of purification of substances.
- ❑ Cultivation and propagation by tissue culture.

Scope of Pharmacognosy

Pharmacognosy is an applied science :

- ❑ Plays an important role in Pharmacology
- ❑ Link between pharmaceuticals and traditional systems of medicine
- ❑ Evolution of modern Drug discovery
